Art Unit: 2136

DETAILED ACTION

- 1. Claims 1-5 are pending for examination.
- 2. Claims 1-5 are rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuzma, U.S. Patent 5,771,355.
- 4. As per claim 1; "An image data management apparatus comprising:

 property information obtaining means for obtaining property information of

 an image data set to be managed [figures 1-6 and associated descriptions,

 whereas the creation of email messages (i.e., source email client/terminal application

 GUI 'obtaining means') and associated attachments (i.e., photographs, image files in

 various appropriate formats, etc.,) such that creation of the email/attachments include

 the creation of associated properties involved in the authorship, forwarding, security

 (i.e., cryptographic encryption/decryption), management, compression

 parameters/protocols, storage (source and destination with associated references versus

Application/Control Number: 10/602,671

Art Unit: 2136

the content alone aspects), clearly encompasses the claimed limitations as broadly interpreted by the examiner.];

security processing method setting means for setting a security processing method for
each of items of the property information [figures 1-6 and associated

descriptions, whereas the creation of email messages/associated attachments inclusive of
associated properties involved in the security (i.e., cryptographic security

policy/encryption/decryption), clearly encompasses the claimed limitations as broadly
interpreted by the examiner.];

security processing means for carrying out security processing on each of the items of the property information according to

the security processing method that has been set [figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachments inclusive of associated properties involved in the security (i.e., cryptographic security policy/encryption/decryption), clearly encompasses the claimed limitations as broadly interpreted by the examiner.];

attachment means for attaching

the property information having been subjected to

the security processing to the image data set [figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachments inclusive of associated properties involved in the security (i.e., cryptographic security policy/encryption/decryption) at the properties/content

creation/transfer/storage level, clearly encompasses the claimed limitations as broadly interpreted by the examiner.]; and

image data storage means for storing the image data set

attached with the property information [figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachment(s) inclusive of associated properties involved in the security (i.e., cryptographic security policy/encryption/decryption) at the properties/content creation/transfer/storage level, clearly encompasses the claimed limitations as broadly interpreted by the examiner.].".

5. Claim 2 *additionally recites* the limitation that; "An image data management apparatus as defined in claim 1, further comprising:

attachment decision means for

setting whether each of the items of the property information

is attached to the image data set; and

property information storage means for storing, in relation to the image data set,

the item or items of the property information

that have been set to be not attached.

wherein the attachment means attaches only

the remaining items of the property information that

have been set to be attached.".

The teachings of Kuzma suggest such limitations (figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachments inclusive of associated properties

Application/Control Number: 10/602,671

Art Unit: 2136

involved in the authorship (i.e., properties of, and content context aspects in terms of what does

Page 5

and does not get attached/specified) at the properties/content creation/transfer/storage level,

clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

6. Claim 3 additionally recites the limitation that; "An image data management apparatus as

defined in claim 1, wherein

the security processing method that can be set by the security processing method setting

means refers to

no processing,

encryption processing, or

electronic watermark processing.".

The teachings of Kuzma suggest such limitations (figures 1-6 and associated descriptions,

whereas the creation of email messages/associated attachments inclusive of associated properties

involved in the security (i.e., cryptographic security policy/encryption/decryption selection and

parameter specifics), clearly encompasses the claimed limitations as broadly interpreted by the

examiner.).

7. Claim 4 additionally recites the limitation that; "An image data management apparatus as

defined in claim 1, wherein

the image data storage means and the property information storage means are

connected to each other via a network.".

Art Unit: 2136

The teachings of Kuzma suggest such limitations (figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachment(s) inclusive of associated properties involved in the transfer/storage (inherent internal node cache/buffer and application specific storage as files, etc.,) at the properties/content creation/transfer/storage level as concerned with the associated information/files references (i.e., URLs, reference pointers, etc.,) so transferred across the network at a LAN, WAN Internet, etc., level, clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

8. Claim 5 *additionally recites* the limitation that; "An image data management apparatus as defined in any one of claims 1 to 4, wherein

the property information includes

an item representing a parameter of image processing

to be carried out on the image data set.".

The teachings of Kuzma suggest such limitations (figures 1-6 and associated descriptions, whereas the creation of email messages/associated attachments inclusive of associated properties involved in the authorship (i.e., properties of, and content context aspects in terms of what does and does not get attached/specified) at the properties/content creation/transfer/storage level, and rendering aspects (i.e., MPEG, JPEG, file characteristics/parameters, linked image object URLs, compression, etc.,), clearly encompasses the claimed limitations as broadly interpreted by the examiner.).

Art Unit: 2136

Conclusion

9. Any inquiry concerning this communication or earlier communications from examiner should be directed to Ronald Baum, whose telephone number is (571) 272-3861, and whose unofficial Fax number is (571) 273-3861 and unofficial email is Ronald.baum@uspto.gov. The examiner can normally be reached Monday through Thursday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh, can be reached at (571) 272-3795. The Fax number for the organization where this application is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. For more information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
